

Tibos TT is a modern, all-in-one IT helpdesk and ticketing platform built for teams that want enterprise power without enterprise pricing — with first-class support for Indian regional languages, built-in AI, and full asset tracking, all on infrastructure you own.

Everything your support team needs — in one place

Multi-Channel Ticketing

Email, self-service portal & chatbot in one queue. Duplicate detection, tags, custom fields, rich descriptions, soft-delete recycle bin.

Email Inbox (IMAP / MS Graph)

Full mailbox: threads, replies, internal notes, forwarding, templates with {{variables}}, per-agent signatures & routing rules.

AI-Native Workflow

Anthropic-powered reply suggestions and thread summarization built right into the agent inbox — draft faster, resolve faster.

Automation & SLA

Automation & escalation rules, SLA tracking, recurring tickets, webhooks and notification channels — set it and forget it.

Knowledge Base

Categories, article editor with version history, powerful search, and one-click linking of articles to tickets for faster resolutions.

Asset Management (ITAM)

Track assets with full assignment history — who holds what, reassignments and a complete audit trail. No separate tool needed.

Analytics & CSAT

Live dashboards, company view, CSAT surveys, activity logs, and one-click PDF / Excel report exports.

Security & Access

Role-based access (admin / staff / user), 2FA (TOTP + backup codes), SSO, session timeout and full portal branding.

7 Languages + RTL

English, Hindi, Tamil, Kannada, Telugu, Malayalam & Urdu (RTL) — plus region-aware timezones. Built for South Asia.

How Tibos TT compares

Capability	Tibos TT	Zendesk	Freshdesk
Indian regional languages (7) + RTL	✓ Built-in	Limited	Limited
AI reply & summarize	✓ Included	Paid add-on	Higher tier
Asset management (ITAM)	✓ Included	Separate app	Higher tier
Knowledge base + versioning	✓ Included	Yes	Yes
Automation, SLA & escalation	✓ Included	Tiered	Tiered
Recurring tickets + webhooks	✓ Included	Tiered	Tiered
2FA / SSO / RBAC	✓ Included	Tiered	Tiered
Self-hosted / own your data	✓ Yes (Azure)	SaaS only	SaaS only
All features, no per-module paywall	✓ Yes	Per tier	Per tier

Why teams choose Tibos TT: All-in-one (no feature paywall) · AI-native reply & summarize · 7 languages incl. RTL · Built-in asset tracking · Own your data on Azure · Modern async stack (React + FastAPI + PostgreSQL) with live WebSocket updates.
